

Response Peer Review

Respected Editor:

Kindly find our attached research paper titled “**Improving Network Security - A Comparison between nDPI and L7-Filter**” for International Journal on Information and Communication Technology (IJoICT).

This paper addresses to response second round review:

- **Response 1.**
The contribution of the presented work has been explained in the paper. The difference between Deri et al., 2014 & Bujlow et al., 2015 and our presented work is clearly explained in the abstract, introduction and chapter 3 system design.
- **Response 2.**
The reviewer has mentioned that our primary contribution is different than what we have mentioned in chapter 3, which is not the case. The primary contribution of the paper is the same as mentioned in the abstract (2nd paragraph), introduction (4th paragraph) and chapter 3 system design.

We are looking forward for your favorable consideration.

Sincerely,

G.B. Satrya, F.E. Nugroho, T. Brotoharsono
